Professional Summary

Systems Support Associate in system support and a strong passion for technology and continuous learning. Actively enhancing technical expertise through Coursera courses in Python, machine learning, AI, professional communications, and professional development. Experienced in practical AI projects, including the development of an AI resume builder as part of an AI bootcamp, demonstrating the ability to apply theoretical knowledge to real-world solutions. Skilled in troubleshooting, problem-solving, and collaborating on team projects, with a goal to contribute to innovative technology solutions and advance expertise in AI and emerging technologies.

Experience

System Support Associate at Capaciti

July 2025 - Present

As a Systems Support Associate at Capaciti, I provide IT support while actively applying and expanding my technical skills through hands-on projects. I have contributed to AI-focused initiatives, including the development of an AI resume builder as part of an AI bootcamp, allowing me to apply Python, machine learning, and AI concepts to practical solutions
